3. screensavers iphone

You can not forward your Mac- WiFi to another WiFi, but you can set up sharing Important note:The one big limitation is that you can't both be connected to a Wi-Fi network and host a Wi-Fi network at the same time.. Enable Internet Sharing and Configure Your HotspotThe Wi-Fi hotspot option is part of the "Internet Sharing" feature in macOS.. Usb wi fi for mac So what you are trying to do with the USB WiFi is not possible using your mac-WiFi.. You'll find it in the System Preferences window Click the Apple menu, select System Preferences, and click the Sharing icon.. Follow the instructions there I believe what you are trying to do is called Internet Sharing.
